ANNUAL REPORT
MONG DUONG COAL JOINT STOCK COMPANY - VINACOMIN
YEAR 2025

To: - State Securities Commission
- Hanoi Stock Exchange;

I. GENERAL INFORMATION

1. General information

- Transaction name: **Mong Duong Coal Joint Stock Company - Vinacomin;**
- Certificate of Enterprise Registration No. 5700101203 issued by the Department of Planning and Investment of Quang Ninh province for the first time on January 02, 2008, Registration for the thirteenth change on November 10, 2025.
- Charter capital: 214,183,460,000 VND (*Two hundred and fourteen billion, one hundred and eighty-three million, four hundred and sixty thousand even dong*).
- Owner's investment capital: 214,183,460,000 VND (*Two hundred and fourteen billion, one hundred and eighty-three million, four hundred and sixty thousand even dong*).
- Address: Group 7, Zone 3, Mong Duong Ward, Quang Ninh Province.
- Phone: (0203) 3868 271/ 3868 272.
- Fax: (0203) 3868 276.
- Website: mongduongcoal.vn
- Stock code: **MDC.**

Establishment and development process

On April 1, 1982, the Mong Duong - Khe Cham coal mine was established under the Hon Gai Coal Union - Ministry of Mining and Coal;

In April 1987, it was separated into 2 mines: Mong Duong Coal Mine and Khe Cham Coal Mine under Cam Pha Coal Company - Ministry of Energy;

On 29/12/1997, Mong Duong Coal Mine was transformed into an independent accounting member enterprise with full legal status of Vietnam Coal Corporation (now Vietnam Coal and Mineral Industry Group - Vinacomin) under Decision No. 24-1997/QD-BCN of the Minister of Industry;

On 01/10/2001, the Board of Directors of Vietnam Coal Corporation issued Decision No. 405/QD-HDQT on changing the name of Mong Duong Coal Mine to

501

Mong Duong Coal Company - an independent cost-accounting member enterprise of Vietnam Coal Corporation.

On 08/11/2006, the Board of Directors of Vietnam Coal and Mineral Industry Group issued Decision No. 2456/QD-HDQT on changing the name of Mong Duong Coal Company to Mong Duong Coal Company - TKV.

On 18/12/2006, the Minister of Industry issued Decision No. 3673/QD-BCN on the equitization of Mong Duong Coal Company - TKV.

Mong Duong Coal Company - TKV has fully implemented the equitization steps according to the State's regulations and officially put into operation under the model of a joint stock company since 02/01/2008 with the trading name: Mong Duong Coal Joint Stock Company - TKV. The company has a charter capital of: 120,850,000,000 VND (one hundred and twenty billion, eight hundred and fifty million VND); of which the State capital held is: 54.03%;

Under the guidance of Vietnam Coal and Mineral Industry Group in Official Letter No. 4648/TKV-HDTV dated 19/8/2010 and implementing the Resolution of the Annual General Meeting of Shareholders in 2011, the Company has carried out procedures to change the name of the Company from Mong Duong Coal Joint Stock Company - TKV to Mong Duong Coal Joint Stock Company - Vinacomin and increased the charter capital from VND 120,850,000,000 to VND 150,839,520,000 through the issuance of bonus shares. Registered charter capital and changed the name of the Company from 20/7/2011.

In 2016, implementing the Resolution of the Annual General Meeting of Shareholders, the Company issued 6,334,394 shares to increase share capital from the equity to increase the charter capital from VND 150,839,520,000 to VND 214,183,460,000. Registered the Company's charter capital from 28/10/2016.

2. Business lines and geographical areas

- The Company's business scope:

TT	Industry Name	Industry Code
01	Power Transmission and Distribution	3512
02	Information technology services and other computer-related services	6209
03	Building houses without dikes	4102
04	Building houses for living	4101
05	Construction of other public-utility works	4229
06	Construction of other civil engineering works	4299
07	Railway construction	4211
08	Construction of road works	4212
09	Repair and maintenance of means of transport (except automobiles, motorcycles, motorcycles and other motor vehicles)	3315
10	Repair of electrical equipment	3314
11	Repair other equipment	3319

TT	Industry Name	Industry Code
12	Installation of industrial machinery and equipment	3320
13	Demolition	4311
14	Site preparation	4312
15	Wholesale of cars and other motor vehicles	4511

34	Mining and collection of hard coal	0510 (Main)
35	Manufacture of metal components	2511
36	Electronics and optical equipment repair	3313

- Main area of operation: Mong Duong Ward, Cam Pha District, Quang Ninh Province.

3. Information on the governance model, business organization and management apparatus

- The company organizes and manages and operates according to the model: General Meeting of Shareholders, Board of Directors, Supervisory Board and Board of Directors.

- Organizational structure of the Company, including:

+ General Meeting of Shareholders;

+ Board of Directors: 05 members;

+ Supervisory Board: 03 members;

- + Mass organizations (Party, Trade Union and Youth Union);
- + The Board of Directors shall consist of: 01 Executive Director, 04 Deputy Directors;

- + Chief accountant: 01 member;

- + Departments and workshop sites include: 13 departments, 23 workshops of production units.

- Subsidiaries, associated companies: No

4. Development orientation of the Company

- The main objectives of the Company: Improving operational efficiency, maximizing profits, creating jobs and stable income for employees, increasing income for shareholders, contributing to the State budget and constantly developing the Company to grow stronger and stronger.

- General and long-term development strategy On the basis of the production and business plan of each year approved by the General Meeting of Shareholders, the Board of Directors sets out specific directions and tasks as follows:

- + The Company readjust its production and business strategy according to the orientation of Vietnam Coal and Mineral Industry Group, in accordance with the actual production and business conditions of the Company from time to time. To build Mong Duong Coal Joint Stock Company - Vinacomin to become a leading underground mining company of Vietnam Coal and Mineral Industry Group with mechanized technology from furnace travel to mining.

- + Quickly implement the procedures for applying for land use planning in the area of the furnace door area +60 West Wing, digging the upper furnace platform at the level of -97.5/+60 West Wing and installing the blower station according to the plan approved by TKV.

- + Completing the dossier of the mine development strategy (Plan to open the seam and expand the Mong Duong mine to the Bac Coc Sau mine area).

- + Prepare a clearing diagram for the pavement to ensure conformity with the transportation plan of the -400 level, serve as a guide for the design and formulation of the plan for investment in production equipment in the following years. Completing the dossier of licensing to put the -400-level explosives warehouse into use. Monitor and control the process of using explosives according to the License.

- + Implement additional exploration drilling projects for areas of the mine.

- + Invest in 01 more CGH market furnace system with medium thickness seams, market furnace capacity from 180-:-200 thousand tons/year. Develop a plan to gradually replace market kilns using frame rack technology with anti-chain rack technology. Develop a plan to replace C14 rakes with SGB 420 or 520 rakes in market furnaces and furnaces along the sidewalk to reduce operating manpower, reduce equipment breakdowns and increase transportation productivity.

- + Maintain the stability of CGH market furnaces, and at the same time mobilize 02 more high-capacity market furnaces (thick seam market furnaces) in the area of L7 West Wing - Vu Mon to ensure that the output and quality of Ak coal closely follow the targets assigned by TKV. The excavation of the furnace to prepare the surface for the CGH market furnace must be calculated to ensure that the truss is installed once to deduct until the end of the market furnace, avoiding the installation of additional trusses

that will affect the productivity and output of the whole year. Implement the application of solutions to fully deduct the collection of protection pillars such as digging enamel kilns, preventing and reinforcing the transport furnace of the upper stratum market furnace to make a ventilation furnace for the lower stratification...

+ Review and rearrange the cycle organization chart for the exploitation and digging of furnaces, minimize auxiliary transmission lines, concentrate sufficient human resources for the main production stage to increase the capacity of market furnaces and digging furnaces (market furnaces and mirrors are reviewed and arranged sufficiently to achieve technical capacity) to increase labor productivity.

+ Implement basic solutions, use appropriate labor arrangements along with solutions to increase labor productivity to restructure the labor force, streamline labor management to the maximum, indirectly serve auxiliary labor to keep and ensure the ratio in accordance with the model of the Group.

Continue to implement solutions on income and promotion in order to retain, attract and create advantages in labor competition, avoiding recruitment and dismissal.

5. Difficulties and risks:

- For the Company, the working conditions are medium at a depth below the level of -100 to -400 above sea level, located under the old exploited areas, waste dumping areas, areas that have been exploited openly, these areas are at risk of storing water and then seeping directly into the furnace lines from -100 to -400, causing the risk of water platforms, gas in the process of mining and digging furnaces.

- The time for workers to stick to work in the mining profession is very short, so the training and arrangement of human resources for enough production lines has not been achieved.

- The awareness of compliance with the KT-AT process in production of workers, even the staff of the production station has not voluntarily complied with the internal labor regulations, working processes, construction measures, safety regulations, to cause accidents for themselves.

- 2026 is considered to be a year of many fluctuations due to increasing and ongoing geopolitical conflicts. For the Company, 2026 is the first year of implementing the 5-year plan 2026-2030. The geological conditions of the mine are forecasted to be volatile and different from the plan, making it difficult for the planning and technology management process, increasing production costs.

II. OPERATION SITUATION IN 2025

1. Production and business results compared to the plan:

2. Organization and personnel

a) *Summary of the Board of Directors: (details as Appendix No. 1)*

b) *Changes in the executive leadership:*

- In 2025, the list of related persons of the Company will change in 01 specific case:

+ Dismissal of Mr. Hoang Trong Hiep Director of the Company (From 9/9/2025)

+ Appointing Mr. Luong Thanh Chung as Director of the Company (from 09/09/2025).

c) *The number of officials and employees in the Company:* Employees on the list of 31/12/2021 is 3,382 people; The average salary is 21,780,000 VND/month/customer: 19,975,000 VND/month, reaching 109%.

d) *Policies for employees*

- The company organizes the correct and full implementation of regimes and policies for employees. Organize medical examinations for officials and employees 01 time/year and for female employees and heavy and toxic workers 02 times/year; Maintain hot baths, buffet meals, and improved salary regimes. In addition to arranging holidays and Tet holidays, the Company also organizes workers and employees to visit, vacation and nursing ...

- The company always creates conditions for employees to study, improve their professional and professional knowledge, regularly sends staff to participate in short-term and long-term training courses on professional skills.

- The company has a reward policy worthy of collectives with excellent achievements, contributing initiatives to technical solutions to help bring high production and business efficiency. At the same time, the Company applies

sanctioning measures and regulations to officials who have acts that adversely affect the Company's image. In addition, the regime of visiting, rejoicing, and sickness with employees as well as relatives is always of interest to the Company

3. Investment situation and implementation of projects:

According to Document No. 6574/TKV-DT dated 25/11/2024, the investment value is 193,373 billion VND; the disbursement value of investment capital is 177,542 billion VND.

- According to Document No. 7116/TKV-DT dated 12/12/2025 (Adjusted), the investment value is 199,487 billion VND (an increase of 6,144 billion VND, equivalent to 3.1% compared to the customer); the disbursement value of investment capital is 188,200 billion VND (an increase of 10,658 billion VND, equivalent to 6.0% compared to the customer).

3.1. The implementation of a number of projects is as follows:

(i). Investment projects for production in 2023

- The project was approved in Decision No. 1878/QD-TMD dated 03/7/2023 with a total investment of 110,706 million VND and the project implementation period of 2023-:-2024.

- Project implementation status up to the time of reporting: The project has been finalized for completion.

(ii). Investment projects for production in 2024

- The project has been approved in Decision No. 1725/QD-TMD dated May 16, 2024 with a total investment of VND 84,869 million and project implementation time: 2024-:-2025.

- Project implementation status up to the time of reporting: The project has been finalized for completion.

(iii). Investment projects in service of production in 2025

- The project has been approved in Decision No. 1236/QD-TMD dated 09/4/2025 with a total investment of 98,652 million VND and the project implementation period of 2025-:-2026.

- Project implementation up to the time of reporting: The project has a total of 09 bidding packages (03 bidding packages for equipment procurement; 01 bidding package for equipment installation; 05 consultancy bidding packages). In which:

+ Completed the contract: 03 equipment bidding packages; 01 package for equipment installation; 03 consulting bidding packages.

+ Contractor selection has not yet been carried out: 02 consultancy bidding packages including audit bidding package and bidding package for verification of settlement of completed projects.

- Implementation plan in 2026: Implement 02 consultancy bidding packages including the project audit bidding package and the bidding package for verification and approval of the settlement of the completed project with a value of VND 1,570 billion.

(iv). Investment project to build 35/6/kV substation in Mong Duong coal mine

- The project has been approved in Decision No. 3310/QD-TMD dated August 21, 2024 with a total investment of VND 36,811 million and the project implementation period of 2024-:-2025.

- Project implementation up to the time of reporting: The project has a total of 08 bidding packages (01 construction and installation bidding package; 07 consultancy bidding packages). In which:

+ The contract has been completed: 3 consultancy bidding packages, including project formulation consultancy bidding packages, planning bidding packages, and bidding packages for the preparation of financial institutions;

+ Currently performing the contract: 01 construction and installation bidding package and 04 consultancy bidding packages including supervision bidding packages; project management bidding packages; audit bidding packages and bidding packages for verification of settlement of completed projects.

- Implementation plan in 2026: Continue to implement the unfinished bidding packages and the remaining 02 consultancy bidding packages, including the project audit consultancy bidding package and the bidding package for verification and approval of the settlement of the completed project with a value of VND 0.178 billion.

(v). Projects on investment in equipment to improve transport capacity

- The project has been approved in Decision No. 1238/QD-TMD dated 09/4/2025 with a total investment of 172,300 million VND and the project implementation period of 2025-:-2027.

- Project implementation up to the time of reporting: The project has a total of 07 bidding packages (02 equipment procurement bidding packages; 01 equipment installation bidding package; 04 consultancy bidding packages). In which:

+ The contract has been completed: 01 bidding package for material winch equipment and 01 bidding package for project formulation consultancy;

+ Currently performing the contract: 01 bidding package for the procurement of passenger winch equipment; 01 bidding package for project management consultancy and 01 bidding package for equipment installation;

+ Contractor selection has not yet been carried out: 02 consultancy bidding packages including audit bidding package and bidding package for verification of settlement of completed projects.

- Implementation plan in 2026: Continue to implement the remaining bidding packages and audit the project; verifying and approving the settlement of completed projects. The value of the plan in 2026 is built by the Company to implement with a value of 106,960 billion VND.

(vi). Project on investment in equipment to improve mine ventilation capacity

- The project has been approved in Decision No. 2795/QD-TMD dated 23/7/2025 with a total project investment of 67,139 million VND and the project implementation period of 2025-2027.

- Project implementation up to the time of reporting: 1/500 scale detailed planning approved in Decision No. 2364/QD-UBND dated June 12, 2025; The investment policy and investor approval are approved in Decision No. 3616/QD-UBND dated September 25, 2025; The land lease decision was approved in Decision spps 410/QD-UBND dated 25/12/2025. Currently, the company is implementing the selection of contractors for bidding packages according to the plan of the project.

- Implementation plan in 2026: Selection of contractors for the construction of project items with an implementation value of VND 41,294 billion in 2026.

(vii). Investment project to supplement backup diesel generators in Mong Duong coal mine

- The project has been approved in Decision No. 3107/QD-TMD dated August 14, 2025 with a total investment of VND 38,454 million and the project implementation period of 2025-:-2026.

- Project implementation up to the time of reporting: The project has a total of 08 bidding packages (01 equipment procurement bidding package; 01 construction bidding package; 06 consultancy bidding packages). In which:

+ The contract has been completed: 2 consultancy bidding packages including the project formulation bidding package and the bidding package for the preparation of TKBVTC.

+ Currently performing the contract: 01 bidding package for the procurement of generator equipment (expected to be handed over by the contractor in 6/2026); 02 consultancy bidding packages including project management bidding package and supervision bidding package.

+ Organizing the selection of contractors: 01 bidding package for the construction of a generator cover house.

+ Contractor selection has not yet been carried out: 02 consultancy bidding packages including audit bidding package and bidding package for verification of settlement of completed projects.

- Implementation plan in 2026: Continue to implement unfinished bidding packages and the remaining 02 consultancy bidding packages, including project audit consultancy bidding packages and verification and approval bidding packages for settlement of completed projects. The value of the plan in 2026 is built by the Company to implement with a value of VND 26,857 billion.

(viii). Investment project on fire protection system on industrial yard site

- The project has been approved in Decision No. 2245/QD-TMD dated June 14, 2025 with a total investment of VND 5,618 million and the project implementation period of 2025-:-2026

- Project implementation up to the time of reporting: The project has a total of 06 bidding packages (01 construction bidding package; 05 consultancy bidding packages). In which:

+ The contract has been completed: 01 construction bidding package; 03 consultancy bidding packages, including project formulation bidding packages, project management bidding packages, and supervision bidding packages.

+ Performing the contract: 02 consultancy bidding packages including the audit bidding package and the bidding package for verification of the settlement of the completed project.

- Implementation plan in 2026: Implement 02 consultancy bidding packages, including the project audit bidding package and the bidding package for verification and approval of settlement with a value of VND 0.084 billion.

(ix). Project on investment in pumping tunnel equipment and power station level -400

- The project has been approved in Decision No. 4076/QD-TMD dated 14/11/2025 with a total investment of 170,851 million VND and the project implementation period of 2025-:-2027

- Project implementation up to the time of reporting: The project has a total of 07 bidding packages (01 mixed bidding package; 06 consultancy bidding packages). In which:

+ Contract has been completed: 01 bidding package for project formulation consultancy;

+ Currently performing the contract: 02 consultancy bidding packages including the project management bidding package and the environmental protection design bidding package;

+ Contractor selection has not been carried out: 01 bidding package for supply and installation of equipment and 3 consultancy bidding packages, including 01 supervision bidding package; 01 audit bidding package and 01 bidding package for project settlement verification;

- Implementation plan in 2026: Selection of contractors for the construction of project items with an implementation value of VND 96,687 billion in 2026.

(x). Investment projects in service of production in 2026

- Project implementation up to the time of reporting: The project is being prepared by the Company as a basis for hiring a project development consultant. It is expected to report to TKV to approve the project before 01/3/2026.

*** Information about each major shareholder holding 5% or more of the Company's voting shares**

1) Shareholders being State organizations: Vietnam Coal and Mineral Industry Group: holding 13,921,925 shares, accounting for 65.0% of the total voting shares of the Company.

2) Foreign institutional shareholders: Raw & Refined Commodities ag – Sweden: holding 3,639,268 shares, accounting for 16.99% of the Company's total voting shares.

c) **Changes in the owner's investment capital**: No

d. **Trading treasury shares**:

Currently, the Company does not own treasury shares, in 2025 the Company will not trade treasury shares.

e. **Other securities**: (None)

6. Environmental and social impact report of the Company

6.1. Management of raw materials:

The Company's business scope: Mining and collecting hard coal according to vertical kiln mining technology. The main raw materials of the Company are furnace excavation equipment and anti-hydraulic racks for coal mining.

6.2. Energy consumption:

TT	Power Type	Unit of calculation (*)	Consumption	Notes	
1	Electrical	Electricity Purchase	kWh	43.789.234	Purchase of 6kV power of electricity
		Self-produced electricity	kWh	104.637	Running Diesel Generator
		Electricity sold	kWh	368.799	Selling 660V and 220V Electricity to Environmental Company and ATM Plant
2	Coal bran 5B.1	Tons	None		
3	Lump Charcoal 1C	Tons	907,01		
4	PROBE	Liters	707.995		
5	LPG	Tons			
6	Natural Gas	Kg	17.038		
7	Gasoline	Liters	71.510		

6.3. Consumption of wastewater treatment water:

- The collection and treatment of mine wastewater is seriously implemented, the amount of wastewater generated during the mining process will be treated in 2025/plan is 9,229,390m³/9,700,000m³. The cost of wastewater treatment is 37,166/42,394 Million VND.

6.4. Compliance with the law on environmental protection:

a) The number of times sanctioned for violations due to non-compliance with environmental laws and regulations: No.

b) Total amount of money due to sanctioned violations due to non-compliance with environmental laws and regulations: No.

6.5. Policies related to employees:

a) Number of employees, average salary for employees:

The list of employees on December 31, 2021 is 3,382 people; The average salary is 21,780,000 VND/month/customer: 19,975,000 VND/month, reaching 109%.

b) Labor policies to ensure the health, safety and welfare of employees:

- To step up mechanization in furnace digging and exploitation in areas capable of applying mechanized lines in order to increase labor productivity, reduce line labor and service (putting chain-frame price market furnaces into operation to replace XDY price market furnaces, bringing furnace excavators, etc rake winches, small conveyors to increase the productivity of digging furnaces). Research and apply technology lines suitable for the Company's minerals in areas with complex geological conditions (ZRY anti-soft rig for slope exploitation, TLPT ZH price, chain frame price for thick seam exploitation, etc.) to increase productivity and free up labor for workers.

- Maintain and open more train routes carrying people from the center to close to the working location to reduce travel time and reduce the loss of strength for workers; invest in and install equipment to transport construction materials and materials near working positions in all production areas to reduce the level of heaviness for workers (limit to the lowest level of manual transportation).

- Strengthen ventilation, gas management, noise and dust control, overcome muddy, cluttered materials and materials, do a good job of industrial hygiene in the pit to ensure the working environment in the pit; create a green, clean and beautiful landscape at the shift house, furnace door, and industrial yard so that new furnace workers and internship students do not feel afraid and depressed when they first come into contact with reality.

- Formulate regulations and regulations on wages and regimes and policies to encourage employees, create motivation to increase productivity and income for employees to attract and retain the labor force; Develop regulations on paying fixed salaries to officials of PXs in association with labor management and revenue so that PXs can renew their thinking, awareness and vision, thereby having labor management methods suitable to the current social situation and labor competition conditions.

- Maintain preferential regimes for furnace workers who return to work shifts in the form of electives, shuttle buses to work, hot baths, washing labor protective clothing, health nursing, washing lung dust, periodic health check-ups, innovating the way of feeding in the middle of shifts, etc. at a higher level, more quality.

- Maintain activities to take care of the spiritual life of furnace workers such as rewarding furnace workers as good workers, high working days, achieving record

productivity, excellent furnace workers in exams to select good workers; Organize for the families of workers directly working in the pit who are excellent in production to go on vacations; organize mass cultural and sports movements in which employees directly participate or directly serve employees so that furnace workers can enjoy spiritual culture and limit falling into evils due to idleness.

- The company strictly implements policies for employees, maintains the use of funds (rewards, benefits, social activities) to encourage employees in production labor and supports and subsidizes employees in difficult circumstances, etc.

The implementation and settlement of regimes and policies are always timely and ensure compliance with the provisions of the Labor Law, the Law on Social Insurance and other regulatory documents prescribed by the State, specifically:

- Maintain and implement well the elective shift rice diet and toxic fostering regime for employees according to regulations to ensure sufficient quantity and nutrition.

- Developed and implemented a plan to organize employees in the company to go on vacation to support treatment for employees at coal nursing centers; Develop and deploy for employees with outstanding achievements in the first 5 months of 2025 to visit the southern and foreign resorts to ensure safety and effectiveness with the support from the Company's Welfare fund of 10 million VND/person;

- Organizing 40/40 employees suffering from silico pneumonia to go for lung washing according to TKV Group's customers.

In 2025, the Company will organize periodic health checks 2 times a year for direct employees and female employees; Indirect labor 1 time/year. The total number is: 6,301 turns, of which: examination and screening of occupational diseases for 2,127 turns of people working with toxic and particularly toxic factors. Examination and approval of sick leave, maternity leave, and convalescence leave for social insurance entitlement is: 11,336 turns = 26,300 workers, total social insurance payment is: 8,962,992,800 VND.

- The company fully and promptly pays the insurance regime for employees in accordance with the law (social insurance, health insurance, unemployment insurance, occupational accident insurance-bnn);

c) Labor training activities:

- Labor management:

The company has strengthened the management and effective use of the existing number of employees, daily summarizing and evaluating human resources mobilized to work units sent to the zalo group to operate, applying paperless daily shift assignments, fingerprint timekeeping, facial recognition, etc manage access to the furnace with cards combined with surveillance cameras to minimize workers from leaving work, leaving early, and returning before the prescribed time; strictly manage unreasonable leave due to cases of 5-day leave continuously complete the dossier to unilaterally terminate the labor contract immediately; In addition, the additional and incentive regimes of the Company's salary are closely associated with the working days of employees. As a result, with measures to strengthen management and a reasonable salary incentive mechanism, human resources are still sufficient for the Company's production line.

- Labor recruitment:

Labor increased in the year by 124 people, of which the number of employees who are students of the Company's target of graduating from school was 51 people, receiving back 71 old workers, and recruiting 02 new people. The number of employees decreased in the period by 191 people, of which 96 employees quit their jobs, 63 employees applied for contract termination, and 23 retired employees. other cases: 9 people.

Although the work of organizational restructuring and labor determination has been made, it has not been implemented in the year, so the rate of indirect management and auxiliary services is higher than the Group's model (Labor management 10.93%/MHM 10%; Service and auxiliary workers 24.2%/MHM 21%); the percentage of students who graduated from school to work at the Company and then quit their jobs, although lower than in previous years, there were still 24 people in the year.

6.6. Reports related to responsibilities to local communities:

The Company always fulfills its production obligations to the state, the life of officials and employees is always improved, donation movements to support, local construction, social work are always valued and fully participated in by the Company; Policies to attract talents and employees are always concerned.

In 2025, the Company's Board of Directors has focused on directing the implementation of many measures: From investing in applying technology, improving travel and working conditions for pit workers, taking care of material and spiritual life, stabilizing production, ensuring jobs, etc income of employees, maintaining community service activities, creating a premise for maintaining and developing the Company sustainably.

6.7. Reports related to green capital market activities under the guidance of the SSC. (None)

III. REPORTS AND EVALUATIONS OF THE BOARD OF DIRECTORS

1. Evaluate the results of production and business activities.

2025 is a year with many difficulties in production and business for Mong Duong Coal Joint Stock Company: Due to the exploitation of small market furnaces, in the year the Company has had to convert market furnaces 18 times/customer 16 times a year; the geological conditions of the CGH market furnace mirror change, the slope is large, the local floating pillar, the market furnace must be deducted in one direction from the top down, drilling and shooting mines to cut the stone of the floating pillar, affecting the productivity and stage progress; many mirrors of the excavation furnace encountered milling and unseamless areas, specifically such as: K8 seam. College, L7 sidewalk. Union; M6. College, L7. VM... so it is necessary to stop digging the furnace, the number of times the furnace is opened, affecting the productivity and progress of digging the furnace; the quality of raw coal was worse than the TH plan by 38.00%/37.28%, an increase of 0.72%, overcoming the above difficulties The Company maintained good internal solidarity, focused on implementing flexible solutions to stabilize production, maintain security and order, social security, etc accelerating the implementation of investment projects, the Company has basically completed the main targets of the 2025 plan, the life and income of employees are at a high level in the Group.

T T	CATEGORIES	DVT	PRODUCTION AND BUSINESS PLAN ACCORDING TO THE DECISION OF THE GENERAL MEETING OF SHAREHOLDE RS	IMPLEME NTATION RESULTS	% TH/NQCD

G	Dividend Payment	<i>%</i>	6-8	6	100

In 2025, the Company has decided on production and business targets in 2025 with main solutions to implement the targets. For the implementation of production and business tasks in 2025, the main targets have been completed and exceeded the plan; for 9 solutions according to the Resolution:

3.1. First: Solutions on long-term strategies, clearance of preparations, results:

a. Focus on adjusting and extending the license No. 2760/GP-BTNMT issued on 31/12/2008 (*the license is valid until 31/12/2025*): The Ministry of Agriculture and Environment has adjusted the content of the mineral exploitation license according to Decision No. 4761/QĐ-BNNMT dated 10/11/2025.

b. Clearing the -250/-400 floor:

Technical plan for exploitation of floor -250/-550: Volume of excavation furnace excavation of floor -250/-400 to be implemented by the end of 2025: 8,450 m/7,694 m (excluding 986 m of furnace adjacent to the secondary vertical well) reached 109.8%; there are

still some items that have not been achieved and are slower than the schedule approved by TKV, the reason is that the Company has not extended the lease of a part of the area of about 02 hectares in the area that is closing the mine according to License No. 2684/GP-BTNMT to construct the above furnace lines in 2025.

Plan to improve transportation capacity: The volume of excavation of underground furnaces for transportation ventilation at $-97.5 \div -250$ and Underground ventilation for transportation at $-250 \div -400$ The Company implements by the end of 2025 to reach 1,240m/KH: 1,240 m to reach 100% of the KH.

Currently, the Company is striving to accelerate the supply and installation of equipment to bring the first market furnace down to $-400/-250$ into operation in January 2026. Thus, the solution of long-term strategy, clearance preparation in the following years when gradually ending the exploitation level above -250 is guaranteed according to the Resolution.

3.2. Secondly: Solutions to maintain the exploitation capacity to ensure the project capacity of 1.5 million tons:

The items set out by the Company to fully implement are reflected in the targets of coal output and furnace meters all exceeding the targets set out in the Resolution, however, although the Company has implemented many solutions at the same time, the quality of raw coal is worse than the TH plan by 38.0% / 37.28%, an increase of 0.72%, affecting the revenue situation. the Company's finances in the year.

3.3. Third: Solutions to mobilize human resources, restructuring according to the TKV model:

The list of employees until 31/12/2025 is 3,279 people/customer: 3,382 people, equal to 96.9%, down 67 people compared to the beginning of the year. Labor increased in the year by 124 people, of which the number of employees who are students of the Company's target of graduating from school was 51 people, receiving back 71 old workers, and recruiting 02 new people. The number of employees decreased in the period by 191 people, of which 96 employees quit their jobs, 63 employees applied for contract termination, and 23 retired employees. other cases: 9 people.

The company has coordinated with TKV Colleges to enroll and train 176/200 students in the profession of mining, M&E in underground mines, reaching 89% of the year's customers.

During the year, the Company stabilized its job, ensured income and had many remuneration regimes for employees, contributing to improving the lives of employees, employees were assured to work and determined to stick with the Company for a long time, as reflected in the indicators of labor management: (i) Employees quit their jobs compared to 2024 decreased by 35.2% (96/148 people); compared to the same period in 2023, it decreased by 40.4% (96/161 people), not only workers in stable PXs but also workers in departments such as KCM, TD, CV in previous years with many fluctuations in human resources are now stable. (ii) Many employees who were previously employees of the Company for reasons have quit their jobs and now return to the Company to work (in 2025, 61/124 employees who are former employees of the Company will be re-recruited, accounting for 49.2% of the total newly recruited employees and many applications for re-employment but due to the lack of demand for recruitment). (iii) The number of students who are self-recruited by the Company exceeds the target assigned by the Group (48/40 students reach 120% of the target assigned by TKV).

In the labor year, the list decreased in the period by 67 people, however, by measures to strengthen management and reasonable wage incentive mechanisms... so human resources are still sufficient for the Company's production line.

* Limitations: Although the restructuring of the organization and labor margin has been planned, it has not been implemented in the year, so the rate of indirect management and auxiliary services is higher than the model of the Group (Labor management 10.93%/MHM 10%; Service and auxiliary workers 24.2%/MHM 21%); the percentage of students who graduated from school to work at the Company and then quit their jobs, although lower than in previous years, there were still 24 people in the year.

3.4. Fourth: Occupational Safety and Safety, Prevention and Control of Crime:

The Company's goal in 2025 is to resolutely not have any catastrophic incidents (flooding of mines, water platforms, gas fires and explosions, broken winch cables); No serious occupational accidents and type (I, II) incidents; minimize other incidents and accidents; not to allow incidents related to fire and explosion to occur in the Company. Results: In the year (up to the time of reporting), the Company did not have serious occupational accidents, occupational accidents (severe, light) occurred 15 cases, down 53.1% compared to 2024, of which the number of serious accidents occurred 13 cases, down 50%, the number of minor accidents occurred 02 cases, decreased by 4 cases, equivalent to 66.7%; About the incident: No type of incident occurred.

Early and synchronous deployment of fire protection works right from the dry season, focusing on areas that have been exploited in 2024 - focusing on new key locations that need new PAs to prevent. Coordinate with units in the area (Deo Nai - Coc Sau Coal Joint Stock Company, Cao Son Coal Joint Stock Company, Ha Long Coal Company, Company 790 - Dong Bac Corporation) to inspect and review the overlapping area of open-pit mining and pit mines; leveling terrain areas at risk of water infiltration, causing water platforms to fall into pits, areas at risk of landslides, flash floods to eliminate the risk of unsafety for people and the Company's mines downstream.

* **Evaluation:** Thus, the OSH work is satisfactory.

3.5. Fifth: Solutions: Operational, technical and technological innovation solutions:

The Resolution sets out the management of quarterly output (Quarter I: Production is not lower than 25% of the annual output; Quarter II: Production is not lower than 25% of the annual output; Quarter III: Strive to produce not less than 24% of the annual output; Quarter IV: Production is not lower than 26% of the customer's annual output), for this content, the Company achieved the annual target, but in the third quarter the Company did not achieve the set target, mainly due to the long conversion of CGH market furnaces from July 20 ÷ September 19 (due to the supply of long transformation, the furnace road transportation route changes many slopes, the compression furnace has a low furnace height, it is necessary to drill and shoot mines to cut stone pillars to lower the railway for the rig to pass through...).

The solution is to review the anti-furnace excavation areas to continuously maintain the CGH excavation technology line with the EBH-45 machine to increase the excavation furnace meter in 2025 and the following years. Continue to maintain motorized equipment in the drilling and loading stages during the excavation of furnaces. Excavators and small conveyors construct furnace lines along small cross-sections; Results: Meters of CGH semi-excavators (using drill trucks, excavators) implemented 0.0m/400 m planned; The meter of CGH (combai)

excavator TH 750m/KH 1,000m, reaching 75.0%KH, so the above solution does not meet the set target.

3.6. Sixth: Investment-cadastral-environment:

Investment: The value of investment in 2025 (TH/KH) is 199.4/193.3 billion VND, reaching 103% of the plan; the value of capital disbursement (TH/KH) was 182.2/177.5 billion VND, reaching 102.6% of the plan.

Environmental work: The implementation value in the year was 61.7/64.1 billion VND, reaching 96.2% of the plan. Completing the environmental license for the worker housing project and the Environmental License for the Phase II Mining project. Completion of mine closure under License No. 2684/GP-BTNMT dated 30/12/2013 was extended in License No. 1145/GP-BTNMT dated 8/5/2019.

Cadastral work: Actively coordinate with the authorities on the site clearance of group 1, area 13, Mong Duong ward (during the year, the Company stopped implementing the site clearance work to relocate households in group 1, area 13, Mong Duong ward according to CV No. 2069/UBND-QLDA dated June 19, 2025).

* **Existence:** During the year, due to the delay in the procedures for renting land with the furnace door +60 West Wing to dig a platform to complete the ventilation upper furnace at -97.5/+60 West Wing and install the main fan station at the furnace door according to the plan to improve the ventilation capacity of the mine affecting the wind network and improve microclimate conditions, working conditions for employees.

3.7. Seventh: Professional work:

For the governance of the cities, leaders; the analysis of labor productivity and salary incentives to promote production, the professional management of the departments meets the requirements; However, although the contracting and management of internal costs have been put into order, the quality of contracting is not high because the acceptance of specialized departments is often slow, the quality of monthly production and business plan assignment is not close to reality, there are many types of materials that are not incurred, supplies and spare parts are regularly repaired for workshops that are not close, many materials and spare parts assigned to the plan but the workshop does not use them or there are materials and spare parts that the unit uses a lot, but they are not built in the plan, in the last 04 months of the year, the Director of the Company must issue many directives, announced the adjustment of cost management, especially material costs and the coordination in reviewing and balancing the demand for materials provided to production workshops.

3.8. Eighth: Security, Legislation, Fire Protection, QS, Security and Order of the School:

The company has maintained the proper implementation of all tasks according to the protection plan in 2025. Safeguard key economic objectives, resources, assets and mine boundaries, and at the same time do a good job of coordinating with local authorities, functional agencies and units in the Company on self-management, patrolling, inspection, prevention and prevention of violations. Properly implement the directives of superiors on local military and defense work. Always follow the State's legal documents, regulations and guiding regulations of TKV to ensure compliance with regulations and at the same time review the issued documents to amend, supplement and re-promulgate them to suit the actual production and business and management of the Company to bring efficiency.

3.9. Ninth: Emulation, propaganda, life and society:

The Resolution sets out:

Taking the health of employees as a priority, they must be dedicated and thoughtful in the process of serving: from quantitative meals, bathing, laundry, travel to entertainment, recreation, convalescence and medical examination and treatment for employees; Organizing typical and excellent employees to visit and travel at home and abroad. Maintain and promote cultural, artistic and sports movements well, as a driving force to promote production. Closely coordinate with the people, local authorities, agencies and businesses in the area in community activities to create a cohesion and harmonious development. This solution has basically been well implemented by the Company and has been evaluated and recognized by the superior agencies and management agencies along with the general excitement of employees in a successful production year.

2. Financial situation:

a) Asset situation in 2025:

STT	Criteria	Year 2025 (VND)	Year 2024 (VND)
1	Total assets (in which)	1.145.469.176.094	1.186.219.315.309
1.1	Short-term assets	392.996.031.806	489.723.930.483
1.2	Long-term assets	752.473.144.288	696.495.384.826
	In which: HH fixed assets	537.239.955.576	481.643.136.402
2	Net Revenue	2.652.989.555.936	2.612.354.731.157
3	Profit before tax	40.367.005.832	70.713.518.496
4	Profit after tax	31.912.405.659	53.326.744.689

In 2025, the Company has invested in the procurement of equipment for exploitation and production maintenance projects with a total investment of VND 153,582 million. Formation of fixed assets depreciated (increase in assets) is: 156,876 million VND. Unfinished investment equipment at the end of the period is: 32,996 million VND.

The decrease in asset value in the year was: 22,291 million VND. (In which, liquidated assets that do not meet technical requirements are 22,291 million VND).

- The efficiency of using fixed assets in 2025 is assessed by the indicator of Net revenue/Value of fixed assets: 4.94 (This ratio is high, proving that the operating situation of good enterprises has generated higher net revenue than fixed assets, the investment in fixed assets of enterprises is justified, reasonable structure, high efficiency).

- In addition to the above-mentioned targets, the monitoring of depreciation of fixed assets in service of production to recover the Company's investment capital is fully implemented, in accordance with the provisions of tax law and enterprise accounting standards.

b/ Situation of liabilities:

STT	Criteria	Year 2025 (VND)	In 2024(VND)	% Increase Decrease
(A)	(B)	1	2	(3=1/2*100)
A	Short-term debt: In which	612.369.720.020	707.938.736.653	86,50
1	Short-term loans and debts	251.447.146.733	269.773.549.049	93,21
2	Payable to the seller	178.311.419.460	175.072.068.330	101,85
B	Long-term debt	216.175.585.799	139.942.369.351	154,47

I	Long-term borrowing and debt	201.104.139.730	132.565.755.610	151,70
C	Total Liabilities (A+B)	828.545.305.819	847.881.106.004	97,72

Total liabilities in 2025 are VND 828.5 billion, down from 2024 to 19.3 billion VND, corresponding to a decrease 2,28%. The company does not incur overdue debts or bad debts.

Short-term liabilities in 2025 will be VND 612.4 billion, down from VND 95.6 billion in 2024, equivalent to a decrease of 13.5%. In which, short-term loans and debts in 2025 will be VND 251.4 billion, down VND 18.3 billion, equivalent to a decrease of 6.79% compared to 2024. Payables to sellers in 2025 will be VND 178.3 billion, an increase of VND 3.24 billion, equivalent to an increase of 1.85% compared to 2024.

Long-term liabilities in 2025 will be VND 216.2 billion, an increase of VND 76.23 billion, equivalent to an increase of 54.47% compared to 2024. In which, long-term loans and debts in 2025 will be VND 201.1 billion, an increase of VND 68.54 billion, equivalent to an increase of 51.70% compared to 2024.

In 2025, the Company has proactively balanced capital sources, reduced short-term loans and increased long-term loans in order to restructure capital in a more stable direction to serve production and business activities. The company still ensures to maintain a stable cash flow to fully fulfill the obligation to pay to the State budget, pay amounts payable to sellers, repay bank loans and pay salaries to officials and employees in accordance with regulations.

3. Improvements in organizational structure, policies, and management

In 2025, the Company has revised the functions and tasks of departments and workshops in the Company, specifically: (i) Re-approving the functions and tasks of the KCS Department to adjust the acceptance of products in the pit; (ii) Stipulating the functions, tasks and powers of the Departments of the Company in accordance with the model model to increase working efficiency, meet the production and business requirements of the Company as well as the Group.

4. Future development plan

Selecting solutions to maintain and develop the Company's production in the direction of sustainable development;

Improve the material, spiritual, socio-cultural life of all employees in the Company and increase values to serve the interests of the community;

Implement cohesive solutions to promote the role and strength of socio-political organizations to develop the Company.

5. Explanation to the Board of Directors for audit opinions: None (Independent audit accepts in full).

6. Assessment report related to the Company's environmental and social responsibility:

a) Assessment related to environmental indicators: In 2025, Mong Duong-Vinacomin Coal Joint Stock Company will plant trees with a total area of 2.8 hectares. In which: Planting trees to improve and restore the environment on an area of 0.3 hectares, planting trees to cover the area around the area of +10 Northeast Mong Duong and the East Wing area is 2.5 hectares.

- Dust prevention and environmental sanitation are minimized by applying measures such as: High-pressure misting in the central coal warehouse area, watering to extinguish dust on the transportation road and cleaning the site and internal roads periodically on Saturdays. The monitoring results in 2025 show that the dust content is within the permissible limits of QCVN 05:2023/BTNMT of the National Technical Regulation on air quality.

- The waste is collected, sorted, warehoused and then transferred to the transportation functional units for treatment according to regulations, specifically as follows:

+ For ordinary waste: Generated from offices, cafeterias, leaves swept from the campuses are collected daily to garbage collection trucks for use and then hired Tuan Dat Environment Joint Stock Company to collect and transport for treatment according to regulations. The volume of collection and transportation in 2025 is 1,900m³, equivalent to 798 tons.

+ For hazardous waste, the hazardous waste collection and warehousing company shall hire the Environmental Natural Resources Company - TKV. The volume of hazardous waste collected and treated in 2025 is 69,011.2kg.

+ For ordinary industrial waste, the Company shall organize the collection, warehousing, and recovery, then hire Environmental Natural Resources Company – TKV and Hon Gai Mechanical Joint Stock Company – Vinacomin to collect, transport, treat and recycle according to regulations. The amount of waste to be collected, transported and treated in 2024 is 326,217 kg.

- The collection and treatment of mine wastewater is seriously implemented, the amount of wastewater generated during the mining process will be treated in 2025/plan is 9,229,390m³/9,700,000m³. The cost of wastewater treatment is 37,166/42,394 Million VND.

- Domestic wastewater: all are collected to the domestic wastewater treatment station with a capacity of 200 m³/day for treatment before being discharged into the environment. The volume of wastewater treated at the 200m³/day domestic wastewater treatment station in 2025 will be 26,977m³. The cost of wastewater treatment is 1,035 Million VND.

b) Assessment related to employee issues:

The Company always ensures that all officers and employees of the Company who sign a contract of 01 year or more are fully entitled to the Social Insurance regime in accordance with the State's regulations. At the same time, labor protection equipment is fully allocated for workers according to regulations, ensuring a safe and clean working environment. Reward employees with good achievements in the production and business process. Every year, the Company also deducts from production costs to support employees to visit and vacation. In addition, during the year, the Company also organized 02 periodic health checks for employees, to promptly detect cases of disease or weak health to be sent for treatment and rehabilitation at the Group's and the State's facilities. The company believes that a stable life and mental peace of mind will help employees have more motivation in labor, achieve high efficiency in business and complete the set targets.

IV. Evaluation of the Board of Directors on the Company's activities

1. Evaluation of the Board of Directors on the Company's activities:

In 2025, the Board of Directors of the Company will continue to direct the Board of Directors to review the issued regulations and develop a number of new regulations to submit to the Board of Directors for consideration and approval and promulgation to apply in accordance with the provisions of law and TKV. In 2025, the Company's CEO has submitted to the Board of Directors for approval the Regulations to strengthen the management of the Company; In the Company's production and business; The Party Committee, Trade Union and CEO signed Joint Resolutions to unify the leadership and movement of the Company's employees and employees. Through supervision activities, the Board of Directors assessed:

- The Board of Directors of the Company has strictly implemented the Resolution of the General Meeting of Shareholders; Resolutions and decisions of the Board of Directors; the Regulations and Regulations of the Vietnam Coal and Mineral Industry Group and relevant provisions of law.

- Safety: With the goal of "Safety is number one", in 2025, the Company will organize OSH training for subjects according to the set plan. Synchronously implement measures to ensure safety, strengthen inspection of occupational safety (periodically and irregularly). Regularly propagate and educate employees on the sense of safety autonomy, and maintain the monitoring of safety work through the surveillance camera system. It was the year that the Company did not have any serious occupational accidents.

- Security and order: Continue to be maintained stably, drastically implemented, prevent the intrusion of the field, control people and equipment operating at the field and enter and exit the field... Regularly inspect and supervise the protection of mine resources and boundaries.

- Emulation - Commendation: From the beginning of the year, the Company has launched an extensive production labor emulation movement throughout the Company with the goal of Safety - Solidarity - Innovation - Development.

- Coordination with mass organizations and the masses in the Company and local government agencies: Together with mass organizations to promote propaganda for employees about production and business tasks and solutions of the Company; well implement the coordination to promote and launch labor emulation movements; the work of ensuring occupational safety and safety; environmental protection... creating consensus and determination to comprehensively complete the assigned targets. For local governments, strengthen cooperation and coordination to ensure harmonious development in the area. Coordinate joint patrol and control between the Company - People's Committee - Ward Police in the mine boundary areas.

2. Evaluation of the Board of Directors on the activities of the Board of Directors of the Company:

In 2025, the Board of Directors has managed production and business and other aspects of the Company's activities in accordance with the law, the Group's direction, the Resolution of the General Meeting of Shareholders in 2025 and the Resolutions and Decisions of the Board of Directors of the Company.
